Now that spring has come, nerves, blood and vital organs cannot remain clogged by poisonous humors nor starved by overwork and lack of sleep without great risk. Paine's celery compound is the most intelligent, wisest means anyone can employ for driving out disease and restoring a healthy tone

## DAILY BANNER TIMES

WILLIAM JENNINGS BRYAN and Richard Parks Bland, who assume to speak for the democracy and to control its destiny, renew in recent utterances their evidence of esteem for the gold democrats, and announce that if they are willing to bury their golden idol and bow down to free and unlimited coinage of silver they may come into the democratic party again; otherwise they cannot. Mr. Bryan, in a recent letter on this subject, says: 'It is as impossible for a person to belong to both democratic organi

zations as it is for a person to be

both a democrat and a republican

at the same time.' SEVEN states had seceded and rebellion was well under way in nearly a dozen states when Abraham Lincoln was inaugurated in 1801. Yet he did not even call his con gress to meet until July 4th. People who are complaining that Presi dent McKinley's administration is legislation completed would do well to compare the progress of events now with those of that pe riod, when the life of the nation Hawesville, on the Ohio river where was being threatened. There is he still resides at the home of his reason to believe that the tariff bill will now become a law by the date at which the Congress was assembled on that occasion.

The Democrat slops over today on the school question and says the Greencastle school board is partisan also, that the BANNER TIMES does all of its printing. What if the board is partisan enough to give what little printing it has to do to a republican paper In Putnam county for years the democratic commissioners besides

robbing the tax payers on every stationery order paid the organgrinder \$9:30 for cheap letter heads that this office offered to furnish for half the sum. The democratic onard is partisan enough to do that kind of jobbing but there is nothing said about it. The BANNER TIMES occasionally gets a small order for printing from the school board grinders. That is not "partisan" - not be too warm, it is democratic and is therefore correct. The Banner Timet never bowels. Never sicken, weaken o in its life received a piece of work gripe, 10c. from Putnam county, school officials or county officials, and we always believed it was because our politics were republican; it cercharges elsewhere.

### Base Ball Notes.

Mercer, the Washington pitcher, has several elements of strength, but the chief of them is that he does not allow men to get to first until they hit for it. He pitched forty-two games last season and gave but nineteen bases. Grand Rapids has claimed Tom Loevit, the old Brooklyn star. He has been in the Eastern league for two years and Catcher McCauley says he looks fine as silk this spring. Lovett should be valuable because he has a good "noddle."

held.

Slowly but surely are the twirlers mastering that five-foot impost placed on the pitcher four years ago, and each season shows less hits than the last, says Joe Campbell. Thus the whitling down of the hits will ultimately make the pitcher the czar he was before the change in the pitching rule, which was made to give the public more batting, that the rule-makers thought was lacking, though the most hypercritical of the fans fancied the old rule.

the rule-makers thought was lacking, though the most hypercritical of the fans fancied the old rule.

Kansas City has released Truby. For three years the cranks in and out of the Western league have been guessing about that man. At times he shows every appearance of a ball player, and then again his work is not up to the standard average amateur, says the Indianapolis News. He has in time proved a failure with every club in which he has played, but always manages to get a good berth. Tom Delehanty, who succeeds him, was purchased from Milwaukee. The Milwaukee cranks do not take kindly to the sale. Delehanty is a good man and a comer, while Tom Daly is liable to go back at any minute.

Uncle Anson stooped to real levity on the day that he recognized the silver question for the first time, says the Washington Post. No saccess had the Bryan metal been handed to the elderly gentleman at the home base when he rinsed the time's cobwebs from his "Pete Brownings," bumped a bunt and was on first before its arrival. Then he made a reconnotier for the second sack, a rash attempt at purlotining, in which he was caught by Morgan Murphy. The spectacle of Uncle confiscating a base in these, his lean-and-slippered pantaloon days, is as sensational as the recent rumor coined by Mercer to the effect that the spendthrift Jack Glasscock was caught in the act of giving away money.

"One of the hardest plays for me to make

rumor coined by Mercer to the effect that the spendthrift Jack Glasscock was caught in the act of giving away money.

'One of the hardest piays for me to make and one that I think bothers every pitcher is crossing to first to receive an assist from the first baseman,' said Billy Rhines a few days ago. 'Casual observers do not realize how hard this play is. Other things are to be considered. The pitcher has to watch for the base and he has also to watch to time his step on the bag with the throw from the first baseman. It is very difficult to look for the base and the ball at the same time, not to say anything about the batter, with whom you are sure to make a head finith at the bag. This is the hardest part of the game for me. I don't know how it strikes other pitchers. I'm telling of my own experience.' Chicago News: The greatest catcher of today, all things considered, is Clements—batting, throwing and backstopping, headwork and generalship considered. The most brillant is Kittridge, but Kitt can't hit like the fat fellow. Neither Kitt nor Clements can run bases, None of the latter-day catchers can. When all points are looked at Mike Kelly and Buck Ewing were a pair such as

liant is Kittridge, but Kitt can't hit like the fat fellow. Neither Kitt nor Clements can run bases. None of the latter-day catchers can. When all points are looked at Mike Kelly and Buck Ewing were a pair such as the game may never see again. They could bat and they could run bases craftily and rapidly; they were good backstops—Ewing much the better in that particular—good throwers and the greatest jolliers and directors of winning play that ever trod the field. In addition they could go in and play any other position, infield or out, even to pitching if desired. They were the wonders of the game and they have had no successors.

Detroit Free Press: The Western league board of directors have overstepped themselves before, so it will not be surprising if they take all sorts of action next Monday when they meet in Chicago for the purpose of disciplining Burnett. This is one of the matters which will come up, according to an interview with President Johnson, but just how the league can act is a mystery. There is not a thing in the Western league constitution which will allow action to be taken on such a case, although the National league provides for it. The case of Pitcher Scott, who is now with Grand Rapids, will come up, but it is not thought that Detroit can win. In regard to the Burnett case, Burnett says that Ebright told him he would punch his head after the game, and Steinfeldt swears he heard him say it. Burnett said that was what led him to make the mistake and punch Ebright on the ball field.

"Pat Tebeau has studied up a new 'con' game since last Season,' remarked Earl Wag-

## Among the Oarsmen.

The Wisconsin crew will leave for New The Wisconsin crew will leave for New Haven to-morrow, and will thus have the opportunity for ten days' work at New Haven before their race with Yale on May 29. In view of the fact that a race between Wisconsin and the Minnesota Boat club is among the possibilities of the summer, the following about the Badger crew will be of interest.

will be of interest. Out of fifty candidates that applied for

of good substitutes. Stahl, A. Chamber-

for this reason it was not deemed advis-

able that he should continue to row.

A. F. Alexander of Menomonie, who is rowing bow, is one of the best and steadiest oarsmen on the crew. He is an all around athlete and a hard worker. He rowed bow in 1895, and last year pulled No. 7. He is inclined to be a little short in his swing, but otherwise his form is

good.
L. W. Olson of Manitowoc, who is the second man in the boat, is rowing on the regular crew this year for the first time. Last year he was a member of the freshmen crew. He has shown great improve-ment over his form of last season, and with a few weeks more of training will pull one of the cleverest oars in the Wisconsin shell. Just at present he swings his body too far forward and lowers his shoulders in the boat. At times he "clips

the catch" and does not finish clean.
H. R. Chamberlain, who looks after things at No. 3, is putting in his second season as an oarsman. Last year he pulled No. 4 on the freshmen crew, and did some creditable work, though he was a triffe awkward. His chief fault is that his swing is not steady. He bends his back at the beginning of the stroke and his catch is not solid. He also has a tendency to cut not solid. He also has a tendency to cut his stroke too short at the finish. A. H. Pritzlaff of Milwaukee rowed No.

last season. At the finish of the stroke he does not carry his shoulders back far enough, and he also shows a tendency at times to "hang the catch." Pritzalff is also inclined to push his shoullers forward too quickly.

H. A. Lake of Madison is the only freshman on the crew, and this is his first year as an oarsman. He is the heaviest man of the eight, weighing 184 pounds. He is a hard worker and an earnest trainer. Lake has shown great improve-ment in the last week, and in time will make a good oarsman. His greatest fault is a tendency to jerk at the finish. He is

crew from his position in No. 6. He rowed yachts, the same place last year, and in 1895 pulled No. 4. At times he permits the Recer eat to get away in advance of his shoul-

Harry Forest of Manitowowc, who is pulling McConville's place at No. 7, is coming in for more than his share in coaching. He is big and strong, but was not in the best of physical condition at the beginning of the season. He is neither steady nor rel'able, and does not Harland & Wolff; the marquis of Duf-

crew swept everything before it in the annual regatta of the Canadian asso-ciation of Amateur Oarsmen, and in the Saratoga regatta of the National Association of Amateur Oarsmen at Saratoga. The crew will be heavily backed to win the four-oared shell race at Henley.

Pugilistic.
The bout between "Kid" Lavigne and Owen Ziegler, which takes place before the Quaker City Athletic club to-morrow evening, is attracting considerable attention among sporting men everywhere. Lavigne realizes that in Ziegler he has a man who will make him exert himself in order to retain his title of lightweight champion. Both men are in strict training. The bout will consist of six rounds.

Jack Davis of Omaha whipped Sailor Brown in about three seconds before the Reliance club at Oakland, Cal., last night Davis was matched to fight eight rounds but before the men had time to warm up Davis smashed Brown in the mouth and nose, followed it up with another blow on the jaw and Brown was completely ex-hausted and the fight was given to Davis.

The fight between "Denver Ed" Smith and Joe Choynski last night, which was scheduled for twenty rounds, was stopped in the fourth round by Referee Roche. Choynski had the best of it all the way through, and Smith to save himself, re-sorted to foul tactics He was knocked down in the first round and nearly out. In the fourth round he clinched and refused to break, rubbing his bloody face and head in Choynski's face. When the two men were separated the referee gave the fight to Choynski. Smith was roundly hissed

A cable from England says that Burge will accept no challenge from American boxers to fight in England, as he is con-templating taking a trip to America after English racing season is over and will try to get another match with Lavigne

Dan Lynch, manager for Sharkey, gave some interesting information regarding the Maher-Sharkey bout. He said the ar-ticles of agreement provide that the bout is to take place in New York between the A. H. Pritzlaff of Milwaukee rowed No.

G on the freshmen crew last year, and is mow pulling No. 4. He has shown a marked improvement in his form over

marked improvement in his form over rork city the \$12,000 is to be equally divided between the two puglists. J'anmy Colville of Boston, who was time peer in the Corbett-Fitzsimmons bork, has been selected to act as referee Lynch says that Brady will bring off the bout either at Manhattan Field, Manhattan Beach or in the Palace Athletic club.

### Miscellaneous.

It seems rather strange to hear of th British cutter Galatea, which tried for the America's cup about a decade ago, being overhauled and fitted with new bulwarks for Mrs. Henn, the widow of Lieut. Henn., her owner. Yet the old America, much older, is to be put into ommission this season. L. F. Austin of Danville captains the cup racers sometimes last as well as other

Recent advices from Belfast tend to confirm previous information to the effect that a yacht is about to be built in Ireland to compete not only for the Queen's cup, but for the America's cup. The yacht is to be built by a syndicate, in-cluding Mr. Gustav W. Wolff, member of exert himself unless it is absolutely nec-nessary. He has a tendency to hang on his oar at the finish.

When the big crowd gathers at the Academy of Music on Saturday night to witness the Corbett-Fitzsimmons fight on canvas they will see many things that are

Battle Show It Plainly.

surprising, and many things over which they will gossip for days. Some time ago W. A. Brady, Corbett's manager, told the newspapers of a foul blow by Fitzsimmons, which he had dis-covered in the veriscope films. The publie was skeptical and the subject was

fropped.

The foul blow is pictured in the veriscope, nevertheless. Nobody who has seen the films can gainsay it. When Corbett's friends see the fight on canvas they will be up in arms. They will see Fitzsimmons land on Corbett's jaw when

the Californian is down.

A foul? There is not the shadow of a doubt of it. But as to its effect on the result of the fight there is only one thing to be said.

Corbett would have been knocked out inyway. The Californian himself will ad-

mit this. It was the solar-plexus punch that did the business, not the foul rap Nevertheless the blow was a foul, tech-Bay night the crowd will judge for themselves as to its foul intent and the damage it occasioned.

Corbett is shown in the picture apparently reeling from the impact of the foul blow He was already reeling, however, from the blow in the stomach. His left and clenched spasmodically under his neart tells the story plainer than words. It was the stomach blow, apparently,

that Corbett was trying to alleviate.

The pictures are in long strips of "films two inches in width and about an inch depth. During the fight they were run off at the rate of about twenty a second. There can be no doubt, therefore, as to the genuine character of the foul.

The pictures are beautifully clear, and even the far away mountains are plainly risible. The spectators who see the show visible. The spectators who see the snow on Saturday night will be hampered somewhat by the prominence of the side post of the ring during the last rush of the fighters, but they will see enough to set them gossiping and quarreling among themselves as to the relative merits of the two reor. the two men.

Fitzsimmons has stated that the stomach punch was accomplished with a right hand feint and a 'left shift.' With all due respect to Mr. Fitzsimmons, it may be stated that he is mistaken. The pic-

the aggressive.

Suddenly, as the bald-headed man comes forward, Corbett lunges out with his left. Then there is trouble. Fitz-simmons ducks to the right. In the pictures you can see Corbett's left arm line a balt of iron over. Fitzeimanns' left. bolt of iron over Fitzsimmons' left

Here is where the solar plexus punch comes in. The left lead has left Corbett's stomach comparatively unguarded. Fitz-simmons steps quickly forward, sliding Corbett's arm over his shoulder to the elbow. Then he hooks his left fist into the pit of Corbett's stomach.

Of this very castle fortress that Landreeies principally owes its origin and its importance.

forward with open mouth. His right hand reaches for the floor. His right knee follows. He seems to be helpless. The film pictures indicate the greatest

excitement about the ringside. The men

confidence in his judgment.

The crew was fortunate in again securing the services of Andrew O'Dea as of regents to make an apprepriation for a

Coach Lehmann has selected the Harvard crew on a new plan. For the first time in the history of Harvard rowing he has issued no call for candidates for the 'Varsity to come out for spring prac-tice. Only eight men started in at the training table instead of double that number as usual. But a close watch was kept on the class crews, and as a man seemed to develop unusual ability on one of these he has been taken to the 'Varsity. In this way Whitbeck was taken from the sopho-more crew and Biddle from the freshmen. Mr. Lehmann in half a year has brought out a graduated system of crews which cannot fail to be of benefit. Never before in the long and checked history of rowing at Harvard has there been any

and is rapidly showing form. His chief fault is a tendency to shorten the stroke at the finish. Otherwise he is regular and appointed Prof. Conway MacMillan its in front of the ring hob up and down and sway from side to side.

As Corbett sinks to the floor with Fitzrepresentative for an international meeting of college athletes to be held at Havre, France, during the coming sumths. He is somewhat heavier than last year. He understands his 3 sition, has a good head, and the members of the crew have confidence in his judgment.

The Yale faculty has reinstated E. C. Eeck, the best man in college with the weights.

An Educational Hint.

Baltimore American: There is much truth in the assertion of a New York woman before a political club that there is too much cramming of childish brains in our public school systems, and that the nation needs realthy children, not prodigies. This cramming process, combined with bad sanitation, overcrowder schoolhouses and lack of air and light, is productive of victous results. An educational process should not adopt the tactics of a burglar,

The Greek and Roman Churches.

the great handicap to the crew is a lack of good substitutes. Stahl, A. Chamber-lain and Logeman are the most promising men, but none of them is the equal of the regulars in any way. It is estimated by O'Dea that the placing of a substitute in the boat will mean a difference of at least ten seconds in the time of the crew in a two-mile race. Early in the season Patrick O'Dea, a brother of the coach, rowed No. 7, but under a ruling of the faculty he was deposed, not having been a student at the university the necessary length of time. Later, McConville, who was elected captain of this year's crew, was tried in this place. He was absent from college some time last year, and the present enthusiasm, and never before have graduate oarsmen rallied to the help of the class crews as they have been doing.

DISCOVERY IN A CASTLE OF THE NINTH CENTURY.

A Memory of the Tragic Middle Ages-Found at Landrecies, at One Time the Principal City in Province du Nord in France.

ANDRECIES was at one time the principal city of the province du Nord, in France, and as it was practically on the frontier of that country it was the objective point of many raids and

sieges from the barons and rulers of the adjacent kingdoms. It was not only the custom but necessity as well, in those romantic cally, and when seen on the big canvas heet at the Academy of Music on Saturcastles of noblemen should be more like forts than dwelling places, says the New York Herald. The discovery just made in this ancient city of Landrecies is a very interesting one. It has led to the unearthing of dungeons lations to each other as if the sight of and strongholds dating back to the a nimble-footed, blue-haired "nanny" ninth, eleventh and twelfth centuries, suckling a clumsy black bear cub was and as the history of the people who of the most ordinary condition of aflived in the days of tournaments and fairs. In the earure by many. Since the passage of the lier days of his adoption the baby was bill depriving Landrecies of its long a baby in truth. He would not be left enjoyed privileges of a fortified town alone. And it would have been a hardpublic opinion has been very much ex- er heart than Ford's that could have cited, for it is appreciated that the resisted the pitiful whimper of the litfortifications of the greater part of the tle fellow whenever he thought that he Chevalier du Ville and the Marechal du was to be left alone within the house. Vauban will disappear entirely, as Had there been any to see it in those well as the "Porte de France," which days they would have witnessed a is original in itself and that there will strange sight. The great, broad-shoulunfortunately not remain in this old dered man following his flock as they tures are as clean cut as so many cameras, and they speak louder than words.

When the knock-out came Corbett was on a slow retreat before Fitzsimmons, who was sliding forward in a knock-whoed sort of a shuffle. He had grown strong since the sixth round and was on great mistake. During the process of could gain a foothold on the rocks he dismantling one of the bastions the carried the cub in his arms. But when very important ruins of a dungeon built in the twelfth century by Nicholas, called le Beau, were uncovered. Nicholas le Beau was "Seigneur d'Avesnes a la Lisere de la Foret de Mormal." on the borders of the Sambre. And it was to the construction drecies principally owes its origin and the pit of Corbett's stomach.

The sight of these pictures ends all discussion as to how the "coup" was administered. Corbett is seen toppling slowly stered. Corbett is seen toppling slowly to this date it is only casually, for it was not until this castle was built that the inhabitants of the "terre de Landrecies" settled around it, thus forming the city of the same name. Jean Froissart tells us in his "Chronicles" (1340) "that after the tragical death of Sire de Poselle, governor of the city, the Sire de Floyon 'was for a long time guardian of the city and chastel of Landrecies." Several letters mentioned the importance of Landrecies at that period. Among them may be mentioned, first, that in which Jean de Blois gives certain powers to Allard de Barbancon. This dungeon is built entirely of sandstone and is

nineteen meters long and fourteen and one-half wide. Its walls in many places are more than three meters in thickness. It forms a large rectangular room, 120 meters square into which access was gained by a small door cut in one angle of the room. This door is hidden and proare one meter and seventy centimeters high and about one meter and ten centimeters thick. The dungeon is in a grooves, its portcullis, its drawbridge and other means then in use for barvault of the dungeon, of which one 1543 Francois I., when he fortified the back and forth regularly between town of Landreces, utilized this solid places thirty miles apart, fortress as a foundation for one of his bastions, and it was given the name of the "Bastion du Chateau." It was doubtless at this time that the dungeon was mutilated and put in the condition in which it has just been discovered. In fact, Messire Martin du Bellay, Seigneur de Langey, the lieutenant of the king, tells us in his "trois gros coulleverts," "that for the with earth and upon which we built our bastion." All this points to the fact that the discoveries still to be

Pigs and Skim Milk. As spring is here it might be well

ciate how always indispensable it is as a factor in a ration that is going to make pigs grow most rapidly, or have ever calculated how much per hundred the skim milk is worth, says Prof. Smith in Country Gentleman. The record of some experiments tried at this station during the past three years may be of interest to your readers on this and related topics. Having an abundance of milk and relatively few pigs, we approached the subject from a somewhat different point of view from the average farmer's; still we were enabled to ask questions of the porkers and obtain answers from them that are of interest to every dairyman at least. The first question asked of the pigs was how much they would give for sweet skim milk if no ened, trembling, bleating she goat was other feed were mixed with it. One brought to the house to take the place pen of seven pigs, averaging 103 pounds in weight, gained 279 pounds ly after much combined force and per- in five weeks, drinking in that time suasion the goat could be induced to 6,225 pounds of skim milk and receivplaced in her care. But the time came fore one pound of live pork for 22.31 when foster mother and foster child pounds of skim milk. Reckoning these were as happy and content in their re- pigs as worth 4 cents per pound on foot, the skim milk was worth close to 18 cents per hundred. The same thing was then tried with eight smaller pigs, weighing but 31.75 pounds each. They made a pound of gain for each 19.23 pounds of skim milk, or at 4 cents a pound for live pigs the skim milk was worth almost 21 cents per hundres. Now, no one would think for a moment of feeding skimmed milk to pigs without putting some sort of solid food with it, and naturally cornmeal comes first on the list as the most common grain feed for this class of animals. Two pens of pigs were therefore selected to try what cornmeal and skim milk were worth as pig feed. One pen of seven pigs averaged 88.7 pounds, and the other 66.1 pounds when the feeding began. The milk was fed warm from the separator, and a pound of cornmeal added to each 7% pounds of milk. At the end of five weeks the heavier pigs had gained sixty pounds each, or twelve pounds per week, and had made that gain at an expense of ten pounds of skim milk and one and one-quarter pounds of cornmeal per pound. The gains of the smaller pigs were not quite as large in the aggregate, but were made with almost exactly the same outlay of milk and dogs had to go. Jack took their place meal. Valuing the cornmeal at \$15 per ton, and the pork again at 4 cents, the skim milk was worth with these fourteen pigs, in five weeks' feeding, almost 40 cents a hundred. This home in Europe. Then a number of sounds preposterous, but these are the his neighbors tried to buy the bear. facts-a pound of pork returned by the pigs for every ten pounds of milk and if he could not take Jack with him he one and one-quarter pounds of cornwould not go. The difficulty about meal. We have been able in but two shipping the bear was overcome, and cases out of many to get our pigs to return us less than 20 cents per huntentedly in the old country, enjoying dred for skim milk. In these days of low prices, therefore, it behooves the factory patron and the dairy farmer generally to husband well his skim milk, feed it mixed with cornmeal to well-bred pigs weighing less than 200 pounds, keep them comfortably housed and expect to get from this source a return for a good share of the cost of

make a thorough test of them before consenting to the venture. I shall drive them myself, and speak out frankly the result of the trial. In whatever else we may differ, Elnathan and I are a unit in our care for your welfare. So, if we show ourselves and the heavenly span of quadrupeds at the door today, you need not fear to accept our invitation.

The gentle and affectionate reassurance contrasted pleasantly with Mr. Withers's authoritative mandate. "Constance! you will hold yourself in readiness to drive out with us this afternoon. We shall call for you at three o'clock. I wish you and Harriet to be entirely prepared for the ride when we come. Young horses do not like to stand in the cold."

An impulse she did not stay to define drew Constance to the window as the two gentlemen descended the front steps side by side. Mr. Withers was a trifle the taller of the two, but his figure was angular and unbending; Edward's supple and elegant, while scarcely a trace of family likeness existed between the swarthy visage of the elder, with its deep-set eyes, long upper lip, and high, narrow forehead, and the lively glance, clear complexion, and spirited mouth that made Edward's physiognomy a goodly sight to more eyes than those that met the parting smile he cast up at the parlor window when he gained the pavement, whereas Mr. Withers stalked solemnly on, apparently forgetful already that he had a home and wife, now that his face was set office-ward.

"Shadow and sunshine!" reflected the gazer. "And they are not more unlike in countenance than in dispositions, aims and conduct-as dissimilar as two upright men can be."

Harriet's shallow treble sounded at her elbow like a repetition of the last thought. "No one would ever take them to be relatives," she said. "Yet each is excellent in his way. Don't you think so?"

"Yes," answered Constance, moving

"Only their ways are so different!" persisted the cousin. "I like Elnathan best, of course, but Edward is the more popular man of the two, I believe-isn't

"I really do not know!" Constance left the room uttering the falsehood. Harriet had a trick of making her intensely uncomfortable whenever the talk between them turned upon the brothers.

"I hate comparisons!" she said to herelf, when she reached her room. "And is forward and indelicate in her to nstitute them in my hearing."

Convinced that the sudden heat varming her heart and cheeks was excited by Harriet's impertinence, she made it her business to stop thinking of the conversation and its origin so soon as she could dismiss it and turn her attention to pleasanter things. It was more innocent and agreeable work: for instance, to write out Edward's part of a new duet upon a fair sheet of paper which he could hold in his hand as he stood by her at the piano, the printed copy being so blurred as to try his eyes. He was very slightly nearsighted, although a casual acquaintance would not have suspected it. She copied music legibly and rapidly, and lately had hit upon this happy device of making him some poor return for the manifold services he had rendered her. "All that I can do leaves me deplorably in his debt," she reasoned. "I never knew what was the fullness and disinterestedness of a brother's love until I met him. But all brothers are not so considerate or devoted as is he. I should understand that."

He Was Indeed Absent-Minded. morning that I forgot my watch," A again in 1875. He has been a Superior tauqua. Mr. Tourgee is 59 years old. little further on he said: "I wonder if I have time to go back and get it." and as he spoke he pulled out his watch from his pocket, "No. I have not time." he concluded, after consulting the dial, and he walked on. Nearing the court house he hired a messenger to go for the watch, paying him a dollar for the service. The messenger returned with the information that the timepiece could not be found, whereupon the lawyer exclaimed, looking up from his books and papers: "That is very strange!" Then he took a swift glance at his watch and said: "It makes no difference, anyhow. I can do without ty of time." And he paid the messenger another dollar.

Paris Policemen Clubs. Policemen in Paris now carry clubs, beautifully decorated. They are pure white, with yellow handles. Around the middle is painted a double blue ribbon, with the city arms at the point where the ends of the ribbon cross. The white color will be more easily noticed than any other by coachmen, the sticks being held like conductor's batons by the policemen in the middle of the street, to direct travel to the right or left or to stop it when needful.

Of Course Not. Watts-"That is a pretty good story you tell, but it won't work." Weary Watkins-"Course it won't. D'you s'pose I'd be travelin' around with it if it did?"-Indianapolis Journal.

age. The driver walks to the other end of the car, swings off the brake, car is drawing the horse; nature is outraged; and the traveler inside is perhaps reminded of the adage regarding putting the cart before the horse. The return is a trifle more exhilarating than the pilgrimage up the hill. Gravitation is a faster steed than the gray horse, and the bottom is soon reached. The car that draws the horse gradually ceases motion and the horse that draws the car backs ungracefully off the platform, shakes himself as if to free himself of the odium forced upon him, and walks' to his station. By this time another electric from the city has emptied its small cargo in the dust and the gray horse looks it over, silently estimates its combined weight, and then climbs again to the top of the hill, only to be brought ig-

off and down to crop the scanty herb- OLD SAW CUTS NO MORE ICE. MARRIAGE REFORM.

Early Rising as Road to Wealth and Wisdom an Exploded Theory.

From the Chicago Inter-Ocean: Some

European scientist, after burning mid-

night oil for years in an eadeavor to discover something new, has jumped in the air in the agony of discouragement and landed with both feet on the time-honored doctrine that early rising is conductive to wealth and wisdom. He stamps the old rhymed adage, "Early to bed and early to rise makes a man healthy, wealthy and wise," as a delusion and a snare, invented by some farmer who wanted to get more work out of his harvest hands. In support of his theory the scientist remarks that insanity is more prevalent among early risers. Farmers, he says, go mad in greater numbers than bankers. He considers raising potatoes more injurious to the nervous system than raising mortgages. Under the new doctrine the gambler will lead a long life, though he may be short at times. Incidents can be cited in Chicago which go to bear up the learned statements of the European iconoclast, who has shivered a gray haired and beloved superstition into atoms. To begin with, there is the milkman, who from years of getting up before it is light around the pump, has been laboring under the hallucination that his milk is thick. This is a form of insanity often met with, but people have been undecided what to attribute it to. The citizen who finds a fish in his cream may not know that another honest man has gone mad. The ravages of early rising are also evident in the case of the young husband who arises in the small hours to lull the screeches of a spell impossible to frame a law prohibiting of colic. Between his set teeth the certain classes of persons in modern breath of a madman hisses the refrain | society from marrying. And yet, asks of a lullaby, stopping now and then to | Dr. Toulouse, is it not deplorable to see breathe a few words not set to the mu- so many unhappy persons born daily sic. BARNATO'S GOOD FORTUNE. of a breach of truth as though he were How He Was Made to Marry a Barmaid.

It is better to be born lucky than rich. When Mr. Barnato was at Johannesburg last year, says the London Figaro, he determined to go to the "You'll only lose your money," said his friends warningly. "Well, I won't take any with me," he replied, "and then I shall be all right." Arriving at the racecourse, he saw a man him what he'd take for it.

"Two hundred pounds," was the re-

"Done with you," said Barnato. "Well, where's the money?" asked the man, as Barnato was proceeding

to appropriate the stall. "Oh! I'm Mr. Barnato. It'll be all

"Well, that's good enough for me." Within an hour Barnato had sold the contents of the stall for £600. He paid the man his £200, staked the balance on the races and won £12,000 before the end of the day.

Perhaps it is not generally known low Mr. Barnato came to be married. The beginnings of his fortune are said to have been due to the prudent purchase of diamonds in South Africa. These he deposited for safety with a ertain barmaid in Kimberley. After time he said to her:

"Give me my diamonds. I'm off for Europe. When I return we'll get married.

monds. Now this astute young lady the mental and physical condition of all is the present Mrs. Barnato, and her Brighton in a silver perambulator.

### THE CLAIRVOYANT OPERATOR. She Buys or Sells Wheat with a Twist of the Wrist.

An odd sight is to be witnessed daily on the Consolidated exchange. Visitors for some time have noted a little group of women who stand all day long in the gallery at the Broadway end of the building, says the New York Mail and Express. They also notice one particular broker on the door who is continually craning his neck and glancing at one of the women in that group. Every once in a while, after a glance, he jumps into the wheat pit, which is just under the edge of the gallery, and makes a transaction.

Only the observing will notice, however, any connection between his operations and the woman whom watches. From 10:30 o'clock till 3 o'clock she stands there, with one hand resting over the railing. With slight movements of this hand she gives orders to buy and sell wheat to the broker. The number of fingers extended indicate the number of thousands of bushels to be done, and a twist up or down of the whole hand tells the broker whether to buy or sell.

But that is not the queer part of it. A stranger asked one of the brokers, a friend of his, who the woman was.

"Why," was the reply, "that's the clairvoyant operator. She's a real clairvoyant all right; she reads the future turns in the market and buys or sells accordingly. Or at least she thinks she reads the future, and maybe she does, selves: "Now, please don't laugh." One but consecrated wills, does He seek for she has lasted longer than the ordinary woman speculator. She has been at it for months.

A FRENCHMAN COMES FOR-WARD WITH A PLAN.

Would Establish a Bureau of Health-Existence of Hereditary Disease in Either Parent Sufficient Ground for Divorce-To Benefit Mankind.

R. TOULOUSE of Paris is certainly a man of original ideas, says the New York Herald. Quite recently he startled Europe by his audacious book on Zola and now he comes forward with an extraordinary

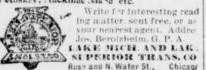

proposition in re-

gard to the time-honored institution of marriage. Here are his views on the subject: Persons of weak constitution, or who have any disease lurking in their system, he says, and especially those suffering from consumption, epilepsy, a cancerous growth, mental imbecility or alcoholism, frequently have sickly or badly formed children, who are stamped with the physical or moral blemishes of their parents, from the evil effects of which they are wholly unable to escape. Still this form of heredity, though extremely frequent, is not fatal; it assumes the most unexpected disguises and hence the malady inherited by the child sometimes differs very much from that which afflicts the father. For this reason it is fisherman in starting out before the their origin to be degenerates? He has been brooding over this subject for in the insane asylum; the delivery man some time and now comes forward with should make his rounds about 8 o'clock, a remedy. Marriage, he points out, is and street cars should start an hour simply a contract the object of which later. Stores might open at 10 o'clock, is to insure the perpetuity and prosand by noon business would be in full perity of the human race. This conblast for the day. Whether there is any tract, then, considered from a purely sanitary point of view, should always will tell. Anyway, it is well to give it be made in good faith. Health is a a trial, and but few will be found who more important factor in married life are adverse to lying abed to give the than money, and the man who conceals from his intended bride the existence of any hereditary, and presumably any acquired, disease is as guilty to conceal from her the fact that he was on the verge of bankruptcy. In common justice then, says Dr. Toulouse, the marriage contract should be reversible in all cases where there is any deception in this matter of disease, and divorce be promptly granted. Only in this way can we be assured of happy marriages, healthy children and a prosperous society. But he goes even further. If a husband or a wife, he says, conceals the existence of a with a peanut and fruit stall and asked hereditary blemish, and if there is born to this couple a child who is continually sick, unable to earn a livelihood, and who is an exceptional expense to the parents, then that parent who has deceived the other should be compelled to pay to the marriage partner a large amount of money as damages. Dr. Toulouse thinks that a law should be passed to this effect, and he explains how it could easily be made operative. Furthermore, he claims that a bureau should be established with the object of looking after the health of individuals. In other words, he proposes that this bureau shall be furnished with passports showing the condition of health of all persons in the community. A recent law obliges physicians to keep a record of all cases of contagious diseases which are brought to their notice, and Dr. Toulouse maintains that the same precaution should be observed in the case of nervous and mental maladies and of all others which afflict the race and are likely to be transmitted from one generation to another. "I think we'll be married first," she If this were done the result would be replied, and those were the only terms that the authorities would have under on which he could get back his dia- their hands and could see at a glance persons within their jurisdiction. Each baby drives along the King's road at passport, it is suggested, should bear a number, and in this way the identity of the person described therein would be known only to the chief of the bureau and to one or two confidential clerks. In other words, it would be a strictly professional secret. In one sense, too, these passports would only be of scientific interest, for it is not suggested that they should be brought into use in the case of persons about to marry. Without the aid of these tell-tale documents, however, it is difficult to see how persons applying for a divorce or for pecuniary damages in the case of sickly children could always substantiate their claims. Dr. Toulouse so far as I can learn, does not suggest they should be used for such purposes, but some of his critics do not refrain from hinting that the passports may be used in this way. They also poin: out that in times of general elections these documents, showing the mental and physical status of all persons. might prove of great service, at least, in the hands of an unscrupulous government. But this is not the only objection which has been made to Dr. Toulouse's proposed law. "Theoretically," says Dr. Maurice de Fleury, "his idea is just, but in practice it would almost certainly give rise to quarrels and interminable and singularly painful law-suits. Dr Toulouse knows as well as I do that neuropathic heredity is rarely one-sided and that a mysterious attraction impels the offending parties to seek each other's society, to live together, to get married and to give life to children who will partake of their double blemish, and who will, so to speak, be doubly degenerate, as though implacable nature were hastening to make an end of such an effete race.

## Remonstrances.

The county commissioners will have two remonstrances to consider at their coming session. Clinton 53.0 township sends in one with 207 names remonstrating against a license to Lon Cook. The number of votes was 267 at last election in Clinton so the remonstrants have a decided majority.

In the third ward of Greencastle petition is filed with 194 signers. The ward cast 323 votes at the late election and the remonstrants again have a majority. John Frazier is

### Literary Clubs.

At Winona yesterday at the meeting of literary clubs officers were elected for the ensuing year as follows: President, J. B. Wisely. of Terre Haute; vice president, Mrs. Beulah Parks Frazer, of Warsaw; secretary and treasurer, Mrs. Cincinnati July 21 and 22, German Harriett Kitts, of Muncie; chairman program committee, Mrs. Grace Julian Clarke, of Irvington.

## The Pimples

That Bloom in

## The Spring

At no other season are Pimples and Humors so abundant or so annoying as in the Spring.

An unseasonably warm day, before change of winter clothing, heats the blood, and these Pimples and Humors itch and burn, and their annoyance, the suffering they cause, is known only to those afflicted.

At no time is a blood purifying medicine more effective than just before and during this season.

If your blood is not right (and whose is?) you are liable to be one of these sufferers this Spring.

A course of Hood's Sarsaparilla begun now and faithfully pursued will save you suffering and give you rugged health, so that you can thoroughly enjoy all the pleasures of the coming summer.

### Pimples on the Face.

"I have been troubled for three years with pimples on my face and body. I tried several remedies with only temporary relief. I am now taking Hood's Sarsaparilla and it is doing me a wonderful amount of good. My general health is greatly improved, and I feel very thankful for what Hood's Sarsaparilla has already done for me." MISS JANE JABROSKY, Burnham, Illinois.

## A Clear Complexion.

"I have had a bad complexion owing to impure blood. I have been taking Hood's Sarsaparilla and my skin is now clear. Hood's Sarsaparilla has done me much good by purifying my blood." ANNIE D. McCoy, Wat-

Boils, Blotches, Sores, Pimples. "I have been afflicted for many years with impure blood, which manifested itself in erysipelas, boils, blotches, sores and pimples. I have used many medicines and found Hood's Sarsaparilla to be the best. I recommend Hood's Sarsaparilla to all who are affected with impure blood.' ISAAC P. MARTIN, Walnut Hill, Ill.

## Annoyed by Eruptions.

"I had eruptions caused by impure blood and at times they were very annoying. I was treated by physicians without benefit, and last winter I took a bottle of Hood's Sarsaparilla and found it helped me. I kept on until I had taken five bottles, and I am no longer annoyed with eruptions." W. R. HUDSON, Natrona, Pa.
